ABSTRACT

The series of selected statistical presentations of public library management data that originated in the Office of Education in 1945 is continued in this report. The data reported were collected with a questionnaire addressed to the 1,178 public libraries which serve areas having at least 25,000 inhabitants. The five tables of data include summary data for public library systems by population size group, summary data for each state and detailed information for each public library or library system, alphabetically, by state. Among the facts gathered from the data were: that public libraries were seriously affected by a shortage of professional librarians, professional staff positions increased, 66 percent of the total expenditures were spent for wages and salaries, total operating expenditures per capita increased to $2.72 in 1965, and library collections and circulation made steady gains in the period 1960 to 1965. The questionnaire form is appended. (AB)

Foreword

This report continues the series of selected statistical presentations of public library management data that originated in the Office of Education in 1945. *Statistics of Public Libraries: 1962* (Part I, Selected Statistics of Public Libraries Serving Populations of 35,000 and Above—Institutional Data, OE–15051) was the immediate predecessor to the present report.

Although the questionnaire for this report was closely modeled after those employed in previous years, there are some important innovations. Instead of using the population base of 35,000 as in previous studies, the base has been dropped to 25,000. Thus, the scope of the survey has been enlarged by an additional 257 public libraries serving populations of 25,000 to 34,999, and this base is compatible with census totals, making it possible to relate important socioeconomic and educational data to these library data.

The formulation of the survey questionnaire was begun in the library Services Branch, and with the establishment of the National Center for Educational Statistics, the survey became a joint effort. The Division of Library Services and Educational Facilities is grateful to the Center for the completion of this project. In particular, the original sponsor wishes to thank Bronson Price and Joel Williams who have given their fullest cooperation in producing this report.

INTRODUCTION		1
TABLE 1.	Summary data for public library systems serving communities with at least 25,000 inhabitants, by population size group: aggregate United States, fiscal year 1965, and percent changes from 1962 to 1965	3
TABLE 2.	Volumes in the collection and staff positions for public library systems serving communities with at least 25,000 inhabitants: aggregate United States, by State, fiscal year 1965	4
TABLE 3.	Income and operating expenditures for public library systems serving communities with at least 25,000 inhabitants: aggregate United States, by State, fiscal year 1965	5
TABLE 4.	Volumes in collection, staff positions, and salaries of chief librarian and beginning librarian, for public library systems serving communities with at least 25,000 inhabitants: aggregate United States, by city and State, fiscal year 1965	6
TABLE 5.	Income and operating expenditures for public library systems serving communities with at least 25,000 inhabitants: aggregate United States, by city and State, fiscal year 1965	38
APPENDIX	Reproduction of Questionnaire Form	65

4

Introduction

The data reported here were collected with a questionnaire addressed to the 1,178 public libraries which serve areas having at least 25,000 inhabitants. Responses were obtained from 1,114, or 94 percent, of the libraries canvassed.

Of the 1,114 respondents, 257 were libraries serving areas of 25,000-34,999 population, while the other 857 served areas with populations of 35,000 or more. Of the 64 nonresponding libraries, the majority were known to be in the group serving areas of 25,000-34,999 population. Since relatively few nonrespondents were among the libraries serving areas of 35,000 or more population, the data may be considered virtually complete for that group.

In the same survey, a shorter questionnaire was sent to a sample of libraries serving populations under 25,000. However, the rate of response and the quality of the returns did not meet the standards for publication.

Each multiple-unit library system—regardless of whether it was federated, affiliated, or regional in nature—was instructed to consolidate the data for all of its member units. All tabulations have been made in terms of these consolidated data. Although the term "library" is used here to include both single-unit and multiple-unit libraries, it should be understood that the great majority of the libraries included in this report were multiple-unit systems of one type or another.

Arrangement of the tables

Table 1 provides summary data for public library systems by population-size group; tables 2 and 3 provide summary data for each State; and tables 4 and 5 provide detailed information for each public library or library system, alphabetically, by State.

Facts and trends, 1960–1965

The shortage of professional librarians is perhaps the most serious problem affecting the institutional health of public libraries. The average vacancy rate, which hovered around 7 percent in 1960 and 1962, was slightly reduced in 1965, becoming 6.7 percent for libraries serving communities of 35,000 or more inhabitants. It is to be noted, however, that the vacancy rate for libraries serving 35,000 to 49,999 inhabitants reached a high of 10.1 percent.

Percent of total professional positions that are vacant, for public library systems serving communities with at least 35,000 inhabitants, by population size group: Fiscal years 1965, 1962, and 1960.

Fiscal year	35,000 or more inhabitants	35,000–49,999 inhabitants	50,000–99,999 inhabitants	100,000 or more inhabitants
1965	6.7	10.1	7.1	6.3
1962	7.2	6.6	7.3	7.3
1960	7.0	8.0	8.7	6.6

Between 1960 and 1965, professional staff positions in public library systems serving populations of 35,000 or more increased 23 percent.

Number of professional positions for public library systems serving communities with at least 35,000 inhabitants: Fiscal Years 1965, 1962, and 1960.

Fiscal Year	Professional positions
1965	14,208
1962	13,320
1960	11,560
Percent increase 1960–1965	23
Percent increase 1962–1965	7
Percent increase 1960–1962	15

In 1965, libraries serving populations of 35,000 or more spent 66 percent of their total expenditures on wages and salaries, 18 percent on library materials and binding, and 16 percent on all other operating functions.

Of the 66 percent spent for wages and salaries, 27 percent was paid to professional librarians, and 39 percent to building and other staff members.

The total operating expenditures per capita for public libraries serving communities with at least 35,000 inhabitants have increased from $1.77 in 1960 and $2.14 in 1962 to $2.72 in 1965.

Total operating expenditures per capita for public libraries serving communities with at least 35,000 inhabitants, by population size group: Fiscal years 1965, 1962, and 1960.

Fiscal Year	35,000 or more inhabitants	35,000–49,999 inhabitants	50,000–99,999 inhabitants	100,000 or more inhabitants
1965	$2.72	$2.06	$2.15	$2.95
1962	2.14	1.68	1.66	2.33
1960	1.77	1.42	1.43	1.91

Library collections and circulation have made steady gains in the period 1960 to 1965.

Volumes held per capita and volumes circulated per capita for public library systems serving communities with at least 35,000 inhabitants: Fiscal years 1965, 1962, and 1960.

Fiscal Year	Volumes in the collection per capita	Volumes circulated per capita
1965	1.6	4.9
1962	1.4	4.4
1960	1.2	4.0

TABLE 1. — Summary data for public library systems serving communities with at least 25,000 inhabitants, by population size group: Aggregate United States, fiscal year 1965, and percent changes from 1962 to 1965

[1] Estimate based on published State report.
[2] Estimate.
[3] Net figure.
[4] Included in figure immediately above.
[5] Includes data for Jasper County.
[6] Includes service to eight elementary schools and one secondary school.
[7] All personnel are considered professional after one year of service.
[8] Included in figure immediately below.
[9] Represents circulation for three months only.

TABLE 5. — Income and operating expenditures, for public library systems serving communities with at least 25,000 inhabitants: Aggregate United States, by city and State, fiscal year 1965

	a. ☐ "X" HERE, IF NONE HIRED DURING REPORTING YEAR.			

NAME AND TITLE OF PERSON FURNISHING INFORMATION	DATE

OFFICE OF EDUCATION COPY

DEFINITIONS AND INSTRUCTIONS

1. Reporting year: All annual data are to cover the library's last reporting year that ended during the period January 1, 1965 to December 31, 1965.

2. Location of reporting unit: Name and location of library should be for the administrative headquarters of the library. For federated, affiliated and regional library systems please consolidate the data of all member units.

3. Volumes: For the purposes of this survey a volume is a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work contained in one binding or portfolio, hardbound or paper-bound, which has been cataloged, classified and/or made ready for use.

4. Staff positions by full-time equivalents: To compute "full-time equivalents (FTE)," of part-time personnel, add the total number of hours worked per week by all part-time personnel (include student assistants and pages), and divide by number of hours in your full-time work week. Do not include volunteer personnel.

   EXAMPLE:

   4 employees each worked 20 hours per week - 80 hours
   2 employees each worked 10 hours per week - 20 hours
   6 employees worked a total of 100 hours

   One hundred hours divided by 40 hours or the number of hours in your full-time work week equals 2½ full-time equivalents. Add these 2½ full-time equivalents to the number of full-time personnel to obtain TOTAL personnel in full-time equivalents.

5. Professional positions are those positions which require the occupant to perform work that requires education, training and skill in the theoretical or scientific aspects of library work as distinct from its merely mechanical and clerical aspects.

6. Receipts: Do not include the value of any contributed services from any source, or any capital outlay, e.g., for buildings, sites, additions.

7. Contract services given to or received from libraries (or from non-commercial centers) on the basis of the payment of a fee may consist of bookmobile services, processing services, extended borrowers' privileges, etc.

8. Director's annual salary: Please give annual salary at the time of the report before deductions. Do not give range.
